EMINENT & EWENT: our vision

The **technological innovation** is in continuous evolution and determines always more our everyday life and traditions. Tablet, mobile phones and PC are nowadays of common use and we would never imagine to live without them.
Unfortunately sometimes more devices means more complexity.
Eminent & Ewent's aim is to create valid solutions for making the use of technological products easy and intuitive. The solutions we offer are created after considering not only WHAT a specific product can do, but HOW people use it.

FUNCTIONALITIES AND EASE OF USE

Whenever we develop a product, we have a **specific aim**. **Every single product has to be easy to use and to install.** Therefore we verify HOW most users use different products in their everyday, i.e while they are playing a movie on their media player device or while they are installing a security camera. For the configuration and installation of products we offer a simple guide. Most of our products are supported by an **installation wizard** in order to complete the operations rapidly and without problems. Our **manuals** are simple written and will guide the users step by step through the installation and use of the product. Support is provided directly from the **Ewent & Eminent multilingual support centre**. We really believe in support!

NO SURPRISES!

Without considering the amount of time invested by our **technicians** for simplifying the products' interfaces, some technologies are too complex without a proper instruction manual. All manuals supplied by **Eminent & Ewent** are not only written by technicians. They are verified and tested by costumers without any technical knowledge. This is why our manuals can be easily consulted by anyone, from system administrators to inexperienced people. The **installation guides** follow the user through all the steps required to get the maximum benefit (from the product). As we said: no surprises!

REFINED AND INNOVATIVE DESIGN!

Our products do not only follow determined **quality standards**, they are also characterized by an attractive design. No exception for packaging: all packages are designed by a **creative team**. You can easily distinguish the category of an **Eminent & Ewent** product by its packaging colour. Design and image are important factors for increasing the selling of a product and we believe in the importance of **promotional materials.** Because of that, when it comes to the presentation and promotion of the Eminent & Ewent brand we offer all the support to our sellers. Do not hesitate to ask us for help!

e-Alarm

Reliable GSM based Alarm System

- ✔ Operates with a mobile phone SIM card
- ✔ Wireless and easy to programm
- ✔ Supports 50 wireless and 2 wired sensors
- ✔ Built-in Siren
- ✔ In case of alarm, a notification is sent to you mobile phone

The Eminent EM8610 wireless GSM Alarm Starter Kit is the foundation for surveillance at home or in the office. The EM8610 works via the reliable GSM network and is equipped with a backup battery so that the alarm will work even if the main power fails.

Alarm notifications via the GSM network
The Eminent EM8610 Alarm System sends alarm notifications through a GSM SIM card in the control panel. Sending an alarm notification does not require an Internet connection or analog telephone line, so the system can be used wherever GSM reception is available. You can program up to five telephone numbers. The control panel contains a loud siren of 110 dB. With your mobile device you can listen along what happens in your house.

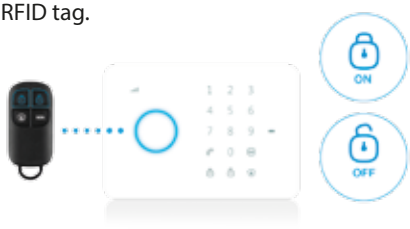
Kit Components
- Control Panel
- Two RFID Tags
- Two Remote Controls
- Wireless Door/Window Contact
- Wireless Motion Detector

Easy installation
1. Insert the Mobile SIM card in the Control Panel
2. Download and set up the free Mobile application
3. Receive alarm notifications via the Mobile SIM card

No Internet connection or wired telephone line is needed for sending/receiving an alarm notification. The e-Alarm works everywhere you will have GSM coverage.

Stylish, wireless, easy to install anywhere
The Eminent Alarm system is completely wireless, so it is easy to install anywhere. Door contacts and motion detectors are powered by batteries. The fixed control panel requires an electrical power connection. In case of power failure it uses two backup batteries.

Easy to control
This alarm system can be controlled by anyone regardless of its age or technical knowledge. The control panel switches the alarm on and off and this can be done also using the remote control or the RFID tag.



Expandable up to 50 sensors
The Eminente EM8610 supports up to 50 sensors so you are ready to expand it whenever you want in the future.

Accessories

	EM8620 **RFID Tag**	Switch off your EM8610 with this RFID Tag
	EM8621 **Remote Control**	Additional Remote Control
	EM8622 **Wireless Control Panel**	Arm and disarm the alarm system
	EM8650 **Dual Wireless Motion Detector**	Pet immune PIR Motion Detector
	EM8655 **Outdoor Motion Detector**	Pet and Microwave Motion Detector for outdoor use
	EM8660 **Wireless Door/Window Contact**	Secure doors and windows
	EM8665 **Wireless Vibration Detector**	Detects vibration on your window
	EM8690 **Wireless Smoke Detector**	Warns instantly when smoke is detected
	EM8695 **Wireless Gas Detector**	Warns immediately when gas is detected
	EM8670 **Wireless Outdoor Siren**	Solar rechargeable Outdoor Siren with flashlight
	EM8675 **Wireless Indoor Siren**	Flashlight and loud signal in case of an alarm
	EM8676 **Stand-Alone Wireless Siren**	A compact wireless siren with stand-alone alarm functionality
	EM8625 **Wireless Signal Repeater**	Easily increase coverage throughout your home

Easy Pro View IP Cameras

Fully App Controlled Video Surveillance

- ✔ Ready in 3 steps
- ✔ Easy set-up
- ✔ Dual lens technology
- ✔ Push Notifications
- ✔ PIR technology
- ✔ Built-in microphone
- ✔ Two-way voice communication
- ✔ Temperature sensor
- ✔ 5 seconds pre-recording

Ready to use in three steps
The Easy Pro IP Cameras are ready in three simple steps.
1. Connect the IP Camera to your network.
2. Download the app on your smartphone or tablet.
3. Access the application with the username and password written on the supplied card.

Once you have completed all these steps you are able to acces the IP Cameras from anywhere just using the Internet connection. Networking knowledges are not necessary.

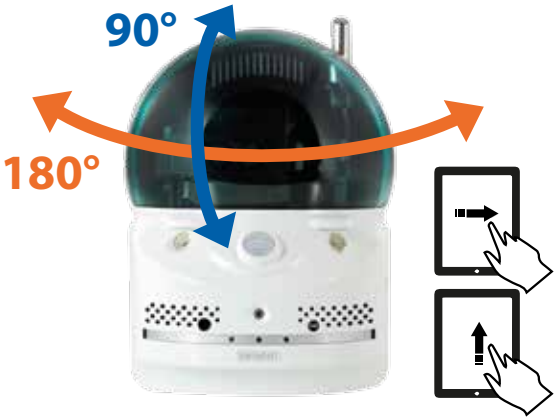
P2P technology
Monitor your home or office from all over the world. With the Easy Pro View IP Cameras this is possible thanks to the P2P technology which allows the sharing and live streaming of images and videos without port forwarding and DDNS. You will only need an ID and a password.

Indoor IP Cameras for all your needs
The IP cameras serie offers three indoor models of last generation: EM6250 , EM6250HD and the EM6270.

The **EM6250HD** offers high resolution pictures and is equipped with a built-in speaker. The **EM6270** – even in HD – is equipped with the Pan / Tilt technology: unlike the fixed lens cameras, the EM6270 allows you to remotely control the camera orientation both vertically and horizontally with a maximal angle of 180°. Just touch the screen and swipe in any direction for displaying all the room's corners.

How they work
Everytime the alarm is triggered, a "push notification" is sent to the pre-configured mobile device. The received message contains both video images and sounds of before and after the triggering of the alarm. The data is saved on the micro SD card inside the camera. The images are always accessible thanks to the free App.

Applications
Surveillance for homes and offices, video surveillance for external spaces and, last but not least, as baby monitor for keeping an eye on the little ones taking under control even their body heat.



EM6260 - The new outdoor IP Camera
For outdoor use Eminent offers a new solution which combines the advanced functionalities of the newest indoor IP Cams with a stronger body structure designed specifically for outdoor use. Thanks to its waterproof housing (IP66), the EM6260 can be exposed to all weather conditions such as rain, sun and high (+50 °C) or low temperatures (-30 °C).
For ensuring clearer images both day and night this IP Cam is equipped with three high power infrared LEDs with a 10 meter range and two HD sensors that switch automatically. The switching depends on light conditions or can be programmed to to occur whenever we want.
Monitoring your front and back door, the garden or your parking lot has never been so easy.

Camera configuration and controlling with app: no computer required

Configure and control the Easy Pro View IP Cameras with the special iOS and Android app. Control on your tablet or smartphone all functions of the cameras.

Dual Lens technology: perfect images both day and night

The Easy Pro View IP Cameras are equipped with two dedicated lenses: one for the day and one for the night. The camera switches automatically between day and night or can be customized with a programmed schedule. You will always have perfect images. The EM6250HD, EM6270 and the outdoor camera EM6260 are equipped with HD day and night sensors for even sharper images.

Monitor every corner in your room with the pan/tilt funcitonality

Control the EM6270 with the Easy Pro View app. Swipe your finger over the screen of your tablet or smartphone to move the camera in the desired direction. You will observe a wider area than with a fixed IP Camera.

Reliable alarm notification due to PIR technology

The special PIR sensor only senses objects which radiate body heat. This PIR sensor ensures an high reliability of the alarm notifications.

**EM6250 / EM6250HD / EM6270 only*

Push notifications: direct message during an alarm

When the IP Camera detects movements or sounds, a direct notification is send to your smartphone or tablet. Also when your smartphone and tablet is in sleep mode. Now you can keep track of everything. Even from the other side of the world. Receive also push notifications when the built-in temperature sensor (EM6250HD, EM6270) detects a lower or higher temperature as desired.

Both detecting and recording

As soon as sound and movements are detected, the images are recorded and saved on a Micro SD card. You can watch the recorded images with the app. An external recording device is not necessary!

**Micro SD card not included*

5 seconds pre-recording: critical moment is caught on camera

It is useful to know what happened before the alarm. The Easy Pro View IP Cameras have a 5 seconds pre-recording functionality. This means that the critical event always is caught on camera.

**Requires Micro SD card*

Two- way voice communication

The IP Cameras support two-way audio. Listen along with the images and speak back to everyone near the camera. You can even warn them activating a siren from the built-in speaker.

**EM6250HD / EM6270 only. EM6250 requires an external speaker set*

For Baby Monitoring

The Easy Pro View IP Cameras are more than just surveillance cameras. These cameras sends notifications when they are triggered by sound and temperature. The built-in temperature sensor keeps track of the temperature in the nursery. This particular functionality makes it also usable as a baby monitor.

**EM6250HD and EM6270 are equipped with a temperature sensor*

Surveillance Kits

with Recorder and Cameras

- ✔ Plug'n Play
- ✔ Recorder with internal hard disk
- ✔ Cameras included
- ✔ Connection cables
- ✔ Remote control
- ✔ Free Eminent DVR App

With Eminent surveillance cameras you can always keep track of your home and office. Use the recorder to store images and retrieve them at a later time. You can also watch live images on a monitor, through the Internet or on a smartphone.

Simultaneous recording and playing back
The digital video recorder has a powerful H.264 processor so that you can simultaneouosly record and playback without losing video quality. When you watch previous recordings, the recorder continues to record new videos.

Watch images on a monitor, computer or smartphone
The digital video recorder streams live images on a connected (VGA) monitor. Connecting the camera surveillance system to the Internet you will have world wide access. Thanks to the Eminent DVR App you will be able to receive the filmed images directly on your smartphone or tablet.

HDD INSIDE
READY TO USE

Video evidence of criminal acts
In case of burglary the recorder will automatically start recording. The recorded images can then immediately copied to a USB flash drive and used as evidence when reporting the crime to the police.

ANDROID APP ON Google play

Available on the App Store

The Starter Kits

- H.264 surveillance recorder with internal hard disk
- The surveillance recorder starts automatically when motion is detected or at preset times
- Watch live video via iPhone, iPad or Android device
- Remote control via LAN and Internet
- Simultaneous recording and play back
- Alarm relay output
- RS485 port for zoom camera
- VGA port for computer monitor
- 2/4 infrared cameras and infrared LEDs for approximately from 5 up to 20 meters vision in dark areas
